waste matters

Waste Matters to everyone at Gaskells

We're proud to be one of the largest independent and privately owned waste management and recycling companies in the North West of England.

With two decades of experience, we understand that every one of our customers is different, which is why we offer specialised and hassle-free solutions.

Everything we do is backed by our commitment to provide an excellent and professional service at extremely competitive prices.

We have invested more than £2.5m in a 24/7 state of the art Materials Recycling Facility, with continued investment in the latest technologies. Gaskells is accredited to demanding international standards:

- Quality Management ISO 9001
- Environmental Management ISO 14001,
- Occupational Health & Safety Management OHSAS 18001

Customers matter to Gaskells.

Our commitment to our customers is to provide a reliable, friendly and professional service every time.

We want to make life easier for you. Our Customer Support Team ensures that everything runs smoothly for you, so waste is one less thing to worry about and while we take care of it, you can concentrate on doing what you do best.

You can trust us to provide an efficient and responsive service.

Our drivers and office staff are helpful and friendly and nothing is too much trouble for Gaskells.

Our services.

We provide a **7-day waste collection service** throughout the North West.

Our vehicles are equipped to capture data from **EVERY** container we empty and record both weight and volume electronically. This information is then used to generate **Environmental Key Performance Indicators (KPIs)**. If you operate to ISO 14001, or a similar management system, our reports will assist your compliance with the standard.

- Gaskells' recycling service will enable you to save money, protect the environment and **reduce your carbon footprint**. Full traceability is guaranteed with our unique recycling performance reports.
- We can help you to comply with the requirements of **Site Waste Management Plan** legislation by tracking the re-use, recycling or disposal of your waste.
- We collect **hazardous waste, waste electrical and electronic equipment (WEEE)** and **asbestos**. We also offer other specialist services.
- We provide **separate collections for glass, paper & cardboard, scrap metal and wood**.

Total Waste Management by Gaskells.

Waste matters to Gaskells and so all our services are designed for your peace of mind when it comes to understanding and complying with the complex legal obligations surrounding waste disposal.

A comprehensive **free waste audit** carried out by our highly experienced staff will identify your needs so that we can design the most cost-effective solution for you — including maximising any opportunities for waste reduction, re-use and recycling.

- **Trade Waste containers** from pre-paid bin bags to wheeled containers and FELs up to 10cu yards capacity.
- **Builders skips** in a full range of sizes for construction, commercial or domestic use.
- **Roll on-Roll off (Ro-Ro) containers** (open and closed) in sizes from 20 to 40 cu yards.
- **Compactors** for high volumes of waste. Reduce waste volumes before collection, save on transport costs and make your site safer and more hygienic.
- **Balers** cut down on waste disposal costs and generate revenue by baling recyclable materials.
- **Hazardous Waste and WEEE.** We identify and assess any hazardous materials in your waste streams and ensure that hazardous waste is documented and disposed of in the most cost effective and environmentally friendly way.
- **Scrap Metal.** We buy and collect industrial, commercial and domestic scrap metal, ferrous and non-ferrous.

Reduce and recycle waste with Gaskells.

Waste costs money — not only the increasing costs of disposal, but also because of the value of wasted materials.

Making more efficient use of resources benefits the environment and helps to reduce the amount of waste going to landfill, so we provide the services that help our customers to measure and reduce their environmental impact.

We own and operate the **largest commercial recycling facility in Liverpool.**

Our Materials Recycling Facility pre-treats all the waste we collect. Materials such as paper & cardboard, metals, plastics, textiles and wood are separated out and recycled.

Open 7 days a week, 24 hours a day, our facility handles over 25,000 vehicle movements a year, processing more than 70,000 tonnes per year.

Together with the waste we collect, we also accept deliveries of both waste and recyclable materials from other waste collection companies, our customers and the public.

We provide customers with exact information on how much waste is being recycled and where it is going, in order to prove full traceability.

Gaskells' vehicles.

Our new vehicle fleet is based on the Volvo chassis, which has a solid reputation for reliability, dependability, fuel economy and low emissions.

All our vehicles are fitted with CCTV – standard reversing cameras and side and front-mounted CCTV cameras for additional safety and security.

GPS tracking maximises productivity and improves customer service levels. The tracking device is linked into on-board weighing technology, enabling us to weigh every bin at every location.

Which waste container do you need?

Pre-paid Bags: Supplied in quantities of 200

- For use where space is limited or where there is no bin storage area.

Trade containers: 240Ltr to 360Ltr 2-wheeled bins ('wheelie bin')

- Lightweight container allows easy manoeuvrability.
- Can be used either inside or outside.

Trade containers: 660Ltr to 1100Ltr 4-wheeled bins

- For small to medium quantities of general light commercial and recyclable materials.
- Hygienic and easy to clean and manoeuvre.

Whatever you need – from compactor hire, Ro-Ro skips and FEL containers to wheeled bins and bags, we are here to help you make the right choice at the right time.

8 cu yard Front End Loaders (FELs)

- For larger volumes of waste.
- Can be easily moved and relocated where required with the use of a forklift truck.

10 cu yard Front End Loaders (FELs)

- For larger volumes of waste.
- Can be easily moved and relocated where required with the use of a forklift truck.

Builders skips

- For construction, commercial or domestic use.
- Range of sizes available.

Roll On-Roll Off (Ro-Ro) skips

- High capacity containers, supplied in 20 to 40 cubic yard sizes.
- Ideal for customers with large amounts of waste.
- Can form part of a scheduled collection service or a request service where you phone when a collection is required.
- Waste charged by weight not volume.

Balers

- Cut down on waste disposal costs.
- Generate revenue by baling recyclable materials.

Compactors

- For high volumes of waste.
- Reduces waste volume before collection.
- Save on transport costs and make your site safer and more hygienic.
